42 yrs Experience in Diabetes, Diabetic foot, Allergy & Asthma, Immuno modulation of course of IgE disorders. Immuno therapy in Allergic rhinitis, Allergic Asthma.

Memories

An experience with Colleague on train to Alwar 1976

During district posting in Internship I was posted at Alwar district. One morning while going to Alwar by train, I was waiting at Jaipur Railway station for train (3-UP) for Alwar, when train arrived at 6.20 am, I was also joined by one of my female classmate of medical college and we both boarded the train and train left for Alwar. Around 8.10am train reached Bandikui railway station , I had a strong urge for tea as I left my residence early in morning hence could not had tea, so I asked fellow colleague to join me for a cup of tea. The moment I asked her for cup of tea she was scared and told me not to get down for tea , I was taken aback and was surprised also so on my further enquiry she conveyed me that while she was a child she saw a movie in which the hero gets down for a cup of tea and the heroine suffers a bad time by the villain and she is still has a strong nightmare for that scene. That day I learnt that even a small scene in childhood may have such long outcomes.
